Marjie Lorraine Corona

Product Designer | B2B SaaS Specialist
Imus, Cavite, Philippines 4103 | marj.corona97@gmail.com | Notion portfolio

SUMMARY

4 years of experience designing complex SaaS products and internal tools across healthcare, clinical trials, and energy sectors.Specializes in transforming data-dense interfaces into clear, actionable outcomes. Skilled in maintaining and scaling design systems and collaborating with cross-functional teams.

EXPERIENCES

Product Designer at Clincove (Contract) (JANUARY 2026 - NOVEMBER 2026)

Skills: Sketching, Wireframing, High-fidelity mockups, Prototyping, Web Design, Mobile Design, FigJam, Figma Make, ChatGPT, Gemini

- Designed AI-assisted workflows for extracting and populating Electronic Data Capture (EDC) forms from scanned documents, including interfaces for reviewing and correcting extracted information.
- Designed mobile experiences for a clinical trial management application, covering Electronic Data Capture, Trial Master File, Investigator Site File, and Study Protocol AI.
- Maintained and scaled the product's design system by introducing design tokens, refining components, and establishing reusable design patterns and guidelines.
- Collaborated with the product team to translate complex clinical trial workflows into functional and intuitive interfaces.

Freelance UI Designer at Uni-life (Freelance) (OCTOBER 2025 - MAY 2026)

Skills: Sketching, Wireframing, High-fidelity mockups, Prototyping, Web Design, Mobile Design, FigJam, Figma Make, ChatGPT, Gemini

- Designed a mobile-first student community application with features for events, group discussions, and community engagement. Supported by a web experience.
- Developed user flows for secure registration, onboarding, profile management, and community interactions.
- Improved navigation and interaction patterns to make student discussions, groups, and social features easier to discover and use.
- Collaborated with CEO, project manager, development lead, sales, and marketing teams to balance user needs, business objectives, partner requirements, and technical constraints.

UI/UX Designer at SolX Technologies (JANUARY 2025 - OCTOBER 2025)

Skills: User Interviews, Usability Testing, Wireframing, Sketching, High-fidelity Mockups, Prototyping, Web Design, Figma, FigJam, Manual QA Testing

- Designed data-dense interfaces for energy management and marketplace platforms, organizing complex information into clear and actionable user experiences.
- Designed end-to-end workflows for bidding platforms, retail aggregation programs, and sales route management tools, translating business and technical requirements into intuitive flows and interfaces.
- Conducted user research and usability testing to identify pain points and inform product decisions.
- Maintained the design system and conducted thorough QA testing to document discrepancies, resolve bugs, and ensure seamless visual and workflow consistency.

UI/UX Designer at Theoria Medical (JULY 2022 - AUGUST 2024)

Skills: User Interviews, Wireframing, High-fidelity Mockups, Voice AI Design, Dashboard Design, Prototyping, Web Design, Figma, FigJam

- Spearheaded the design of Electronic Health Record (EHR) applications, encompassing dashboards, medical charts, and annual charting compliance updates.
- Analyzed clinical workflows and translated user insights into intuitive software solutions, optimizing task efficiency for healthcare professionals.
- Redesigned dashboard experiences to improve access to schedules, encounter notes, and patient documents, supporting efficient information retrieval for clinical and administrative users.
- Designed and refined data-dense clinical features, including wound care documentation and examination workflows.
- Contributed to annual product updates, improving existing features and adapting interfaces to evolving product requirements and clinical needs.
- Fostered effective collaboration with cross-functional teams to align product goals and requirements with user experience needs, cultivating a supportive environment.
- Streamlined design and development workflows and contributed to the documentation, significantly improving design-development handoff efficiency.

OTHER SKILLS AND CERTIFICATIONS

Certifications (IxDF)	**Design**	**Tools**	**AI**	**Coding**
Visual Design: The Ultimate Guide	Sketching	Figma	ChatGPT	HTML
Design Thinking: The Ultimate Guide	Wireframing	Adobe XD	Perplexity	CSS
User Research - Methods and Best Practice	Web design	Whimsical	v0	TailwindCSS
	Mobile design	Figjam		
	Responsive design			

ACADEMIC BACKGROUND

BS. Computer Science at Adamson University
2015 - 2022
